Dear FCC,

As an XM Radio subscriber, I urge you to reject the NAB's petition 04-160. With a career in sales, I spend most of my time travelling in various metropolitan areas around the country. I subscribe to the XM service so that I can listen to the music I love regardless of where I travel. When XM added local traffic and weather I was extremely pleased -- it is difficult to find the right FM or AM stations when one is unfamiliar with an area, but with XM I can get off the plane, into the car, and quickly be updated on current situations without searching the dial.

At my home in the mountains it is extremely difficult to pick up local radio stations - yet another reason I subscribe to XM. Please don't limit the programming; competition is a good thing as it brings all involved to a higher level. XM radio is an innovation and their broadcasting should not be held back.

Please reject NAB's petition 04-160.

Thank you,

Fran Matott - XM subscriber
